

APPOINTMENT OF NON-EXECUTIVE DIRECTOR

Locksley Resources Limited (ASX: LKY, OTCQX: LKYRF, FSE: X5L) ("Locksley" or "the Company") is pleased to announce the appointment of Mr David Sanders as Non-Executive Director, effective today.

Mr Sanders has more than 20 years' experience in corporate law and is currently Corporate Counsel at Bennett, where he has advised numerous entities, including ASX-listed and private companies, on capital raisings, mergers and acquisitions, compliance with the Corporations Act and ASX Listing Rules, and commercial transactions across a range of industries and jurisdictions.

In addition to his legal qualifications, Mr Sanders holds a Bachelor of Commerce and a Graduate Diploma of Applied Finance and Investment from the Securities Institute of Australia. He has extensive board experience across the resources sector, currently serving as a Non-Executive Director of SQX Resources Limited and Iron Bear Resources Ltd, and having previously served on the boards of Javelin Minerals Limited and SI6 Metals Limited.

The Board believes Mr Sanders' extensive legal and commercial expertise, combined with his experience advising ASX-listed resource companies and his prior board experience, will provide valuable strategic and governance support as the Company progresses its exploration and development activities.

Locksley's Chair, Mr Bevan Tarratt, commented:

"We are pleased to welcome David to the Board. His strong legal and commercial background, combined with his experience serving on ASX-listed company boards, will further strengthen the Board and support the Company as it advances its strategic objectives."

This announcement has been authorised for release by the Board of Directors of Locksley Resources.

ABOUT LOCKSLEY RESOURCES LIMITED

Locksley Resources Limited is focused on critical minerals in the United States of America. The Company is actively advancing the Mojave Project in California, targeting rare earth elements (REEs) and antimony. Locksley is executing a mine-to-market strategy for antimony, aimed at re-establishing domestic supply chains for critical materials, underpinned by strategic downstream technology partnerships with leading U.S. research institutions and industry partners. This integrated approach combines resource development with innovative processing and separation technologies, positioning Locksley to play a key role in advancing U.S. critical minerals independence.

Location of the Mojave Project Blocks in south-eastern California, USA
